

GruberCare Flange Wax

GruberCare Flange Wax is a blend of tough, low luster waxes formulated for use on flanges, mold boxes, backsplash doors, hinges, and female hats or any spot where easy release of marble matrix is more important than the finish obtained. When properly applied, flange wax will simplify mold clean-up, minimize repairs and extends mold life.

Instructions

Apply at least three coats of Flange Wax to desired areas, as well as the inside and outside surface of female molds. Allow each coat of Flange Wax to dry, but do not wipe wax off between applications. This will allow the wax to "build-up", and provide for multiple release. Periodically, apply additional Flange Wax to assure continued release of matrix.

Order Information

108 oz can - Ea - #010618

108 oz can - Case of 4 - #010617

5 Gal (Slurry Wax equivalent) Pail - Ea - #010645

Notice: GruberCare Flange Wax in cases of 4 (010617) and 5 gallon Pail (010645) are now classified as Flammable Solid.
