

## Spa Jets

Spa Jets deliver a higher water flow than ordinary whirlpool jets. Since they are adjustable, the water can be directed to a specific location. The water volume can also be adjusted by simply twisting the nozzle. You can add separate air flow controls or pneumatic on/off switches to create separate back or foot controls for ultimate versatility in a whirlpool bath.

## Spa Jets

These jets offer a different look compared to traditional whirlpool jets, as well as unique functional capability not found in traditional whirlpool baths. Combine these with other options such as Mini Jets and Whirly Jets on large tubs, such as the [Mark 26](#) or [Mark 43](#), and the result is the ultimate in relaxation! You can also add 2 Spa Jet assemblies to a 6 jet system to make a appealing, simple upgrade.

Gruber offers Spa Jets in a variety of forms - as part of a whirlpool kit or as individual jet "assemblies". A Spa Jet Assembly is comprised of the parts shown in the illustration (at right), which includes the Spa Jet Body, the Spa Jet Nozzle, a Wall Fitting, and the Spa Jet Face Cap. Together, these components make up one "Spa Jet".

If you are interested in creating a whirlpool system, then you should refer to the Whirlpool Kit section to review hundreds of already-configured [Duraflo Whirlpool Kits](#). If you just need to replace an individual jet, then continue reading below.

### Spa Jet Assembly

This is the assembly mentioned above, of the components - a Spa Jet Body, the Spa Jet Nozzle, a Wall Fitting, and the Spa Jet Face Cap.

### Spa Jet Nozzles

Spa Jets utilize a nozzle to create a venturi action.

Classic White (CWHT)  
#SJN090

Bone (BOE)  
#SJN080

Biscuit (BIS)  
#SJN290

Chrome Metal (CHM)  
#SJN250

### Spa Jet Body

All Spa Jets have a 1" jet body and are available in a variety of colors/finishes described below.

1" White  
#SJB090

1" x 1/2" White  
#SJB09N

## Spa Jet Wall Fittings

All Spa Jets Wall Fittings. Available lengths are Short, Medium and Long. Refer to the specifications for each item below.

### White. 1" Short

For tub wall thicknesses less than 3/4" (such as acrylic tubs)  
#SJW00S\*

### White. 1" Medium

For tub wall thicknesses from 7/8" - 1-3/8"  
#SJW00M\*

### White. 1" Long

For tub wall thicknesses greater than 1-3/8"  
#SJW00L\*

## Individual Jet Face Caps

These are individual Spa Jet Face Caps, and are sold individually. Alternatively, you can purchase these in sets called Cap Sets (below), or as part of a complete whirlpool kit.

Spa Jet Caps are 3" in diameter.

## Jet Face Cap Sets

Spa Jet Capsets are pre-configured sets of Spa Jet Face Caps. You may also order them individually, but if you need a set of 4, 5, 6 or 8 Jet Face Caps, it's more economical to purchase them as a complete Capset. Please refer to [Spa Jet Face Cap Sets](#) for details on Spa Jet Face Caps. Alternatively, you can order a **complete whirlpool kit that includes Spa Jets**.
