PROlite™

Mineral Based Lightweight Material

Technical Information

Prolite C250

Prolite C250 is designed as a lightweight additive to complement your formulations, giving you the ability to adjust mix densities to meet your economic and quality requirements. Prolite C250 is manufactured, processed, and quality controlled to the highest standards.

Advantages of Prolite C250

- Reduce part weight
- Resin reduction
- Thermal & sound insulating properties

Physical Properties (Typical)

Specific Gravity	0.25
Loose Bulk Density (lb/ft ³)	7
Free Moisture content	<0.4%

Packaging: 15# bags, 600# pallets from Rockwood, MI.

February 2018

Terms and Conditions of Sale: All statements, technical information and recommendations are based on tests we believe to be reliable, the accuracy or completeness is not guaranteed, and the following is made in place of all warranties, expressed or implied. Our only obligation is to replace product proved to be defective. We shall not be liable for any injury, loss or damage, direct or indirect, from using or not being able to use the product. Before using, customer must determine the suitability of the product for the intended use and customer assumes the responsibility. This statement may not be changed except by an agreement signed by an officer of The R.J. Marshall Company.
