

Black (Reinforced) End Stop Divider Bars

Black Divider Bars are reinforced.

For unreinforced end stop divider bars, see the [Yellow End Stop Divider Bars product page](#).

These reusable black dividers are indispensable for custom set-ups where cove-back or integral backsplash molds are involved. Designed to fit the contours of a specific cove-back mold, End-Stop Dividers are used to establish the end boundaries for custom tops and are composed of a urethane material that provides a more finished edge on the part. When ordering, indicate the specific mold

series number (straight or dripless) with which the divider will be used. For other requirements, call for assistance. Sold individually.
