

GruberCare MR WetStrip Mold Cleaning System

WetStrip Cleaning System replaces the use of harsh solvent cleaning after new mold building or maintenance processes. Designed for thorough cleaning of all mold finishing compounds, including wax based release systems, and substantial removal of polymer based release systems. Excellent for surface preparation prior to application of polymer or waxed based releases. This product is not designed for dissolving styrene buildup, green wax crystallization or other process contamination.

Benefits

- Ecological - all water based, biodegradable.
- Labor saving - cleans faster than solvent wiping.
- More effective - better porosity cleansing of polishing compounds.

This product may be purchased as a Kit or individually.

GruberCare WetStrip Kit

Kit includes 1 gallon WetStrip Cleaner, 1 gallon WetStrip Rinse, 2 empty spray bottles and 1 brush.

Order Information

Kit - Ea - #MR0600

Individual components

Spray Bottle - Ea - #MR0602
