

Yellow (Unreinforced) End Stop Divider Bars

Yellow End Stop Divider Bars are unreinforced.

For reinforced end stop divider bars, see the [Black End Stop Divider Bars page](#)

These reusable yellow dividers are indispensable for custom set-ups where cove-back or integral backsplash molds are involved. Designed to fit the contours of a specific cove-back mold, End-Stop Dividers are used to establish the end boundaries for custom tops and are composed of a urethane material that provides a more finished edge on the part. When ordering, indicate the specific mold series number (straight or dripless) with which the divider will be used. Two styles are available - Reinforced (Black) or Unreinforced (Yellow). For other requirements, call for assistance. Sold individually.

Part Number	Series	Edge	Description
010752	110	Straight	1-1/4"
010754	110	Straight	EZ Fit with Grin
