

Electric Vibrators

These electric vibrators are designed and built to withstand the rigors of the industrial environment and operate in a continuous duty cycle. This series is so tough we guarantee them for 3 years even when operated at 100% amplitude setting, in a 24/7 operating environment. Each vibrator is manufactured using the latest automated techniques, insuring exact bearing and seal fits. Add vacuum impregnated windings and you have a high performance vibrator second to none.

- Promotes flow within a cavity, resulting in more uniform filling and less air voids
- Quiet - high frequency energy, resulting in a substantial reduction in noise. Operates at 60 - 70 dBA, the same as a standard electric motor. Air driven piston vibrators operate as high as 120 dBA.
- Engineered beyond industry standards. Built to last, with vacuum impregnated windings, o-ring seals, and machined surfaces provide an IP 66 rating to protect against the entry of dirt or water, virtually eliminating the possibility of failure.
- 3-year guarantee when operated within factory recommendations.
- Offer a wide range of force by changing the settings on the eccentrics
- Adjustable output
- Weight can be positioned for precise control of force.

230/460V, 60Hz, 3-Phase Electric Vibrator

- 230/460V, 60Hz, 3-Phase
- 1.5/.75 Amps @ 3600 RPM

Orange, Explosion-Proof - #0831174
