

THE R. J.  
MARSHALL  
COMPANY

# THINCHIPS

ThinChips are a series of 1/4<sup>th</sup> inch random cut, flat, decorative polymer chips that give a large chip look to spray or pour granite effect products. At 4-5 mills thick, ThinChips have the unique ability to soak up resin/gel coat which allows them to become flexible enough to the point of being sprayable. With this flexibility, ThinChips can handle light mixing in a pot mixer without considerable degradation. Add ThinChips in with a cast or spray granite to create a new design. ThinChips are currently featured in SGE and SFHD colors.
