

JOB OPENING

The RJ Marshall Company (www.rjmarshall.com) provides specialty fillers, fire-retardant and smoke-suppressant additives, and raw and blended materials for cast-polymers, composite markets, and industrial manufacturing industries. The company is headquartered in Southfield, MI, and has been in business for over forty years. We have four production facilities strategically located across the United States.

Position: Lab Manager

We are seeking a lab manager for our Rockwood facility located at:

21220 N. Huron River Dr., Rockwood MI 48173

Primary responsibilities are quality control of produced products and incoming raw materials using standard laboratory test procedures. Other responsibilities include technical service, special projects, technical report writing, document control, and the oversight of all lab equipment. The lab manager supervises a crew of ~ 3 lab techs daily and is responsible for scheduling, training, and product approval.

The successful candidate will have a background in materials science, chemical analysis, or equivalent experience in a QC lab setting. Must be detail-oriented and demonstrate a strong understanding of basic math and possess effective written and verbal communication skills.

General Description:

- Days, 40 hours per week, 8 – 4:30 typical
- Reliable, a positive attitude, and strong work ethic
- Pass a background and physical and drug test
- Provide three references
- Laboratory experience preferred
- College diploma or equivalent combination of education and experience
- Wages \$22 /hour (Pay commensurate with experience)
- Must be able to distinguish colors and be able to pass a color test.

We offer competitive wages, full medical benefits with employee contribution, paid holidays, and a 401-k plan after 1 year

For consideration please email resumes to: kzane@rjmarshall.com
